COMMONWEALTH OF PENNSYLVANIA.

FOR THE YEAR ENDING JUNE 1, 1879.

HARRISBURG:

JANE S. HART, STATE PRINTER.

1880.

REPORT

OF THE

SUPERINTENDENT OF PUBLIC INSTRUCTION.

COMMUNICATION.

DEPARTMENT OF PUBLIC INSTRUCTION,
HARRISBURG, *January, 1880.*

To His Excellency HENRY M. HOYT,
Governor of the Commonwealth of Pennsylvania :

SIR: In compliance with the requirements of law, I have the honor to submit, herewith, the report of the Superintendent of Public Instruction, for the year ending June 1, 1879.

Very respectfully,
Your obedient servant,
J. P. WICKERSHAM,
Superintendent of Public Instruction.

REPORT OF THE SUPERINTENDENT.

To the Senate and House of Representatives of the Commonwealth of Pennsylvania :

GENTLEMEN: The law, in accordance with which the Superintendent of Public Instruction makes his report, reads as follows: "He shall prepare and submit to the Legislature an annual report containing a full account of the condition of the common schools in the State, the expenditure of the system during the year, estimates of the sums requisite for the ensuing year, the whole number of pupils, the cost of teaching each, the number of districts, plans for the improvement of the system, and all such matters relating to the concerns of common schools, and the duties of his office as he may deem it expedient to communicate." Let it be noticed that, under the law, he is required to prepare an annual report and *submit* it to the Legislature, but as according to the provisions of the new Constitution, the Legislature does not hold a session during the present year, the performance of that duty is simply impossible, and the law that enjoins it is therefore null; but even if otherwise there could be any question about the matter, it would seem to be conclusively settled by section two of the schedule of the Constitution which reads: "All laws in force in this Commonwealth at the time of the adoption of this Constitution not inconsistent therewith . . . shall continue as if this Constitution had not been adopted." A law that requires an *annual* report to be prepared and submitted to the Legislature, is inconsistent with a Constitution that provides for a meeting of that body to receive such a report *only once in two years*—a law that requires, among other things, "estimates" to be made this year "of the sums requisite for the ensuing year" is inconsistent with a Constitution under whose sanctions these sums have already been provided, and is, therefore, virtually repealed.

With this view of the law and my duty under it, I would have omitted altogether the publication of a report the present year, and prepared and submitted to the Legislature at its next session a biennial report, embracing the operations of our educational system for two years, had I not found it to be the prevailing opinion among the other heads of departments and officers of the State government that it would be unwise at once to adopt this policy. Thus influenced, I have yielded my opinion as to the legality of an annual report, so far as to compile and publish the usual statistical tables and statements showing the financial condition of the system. These, at

any rate, would have been embraced in a form somewhat more condensed in the contemplated biennial report.

I omit, of course, all estimates for the ensuing year, as these are already provided for; and, also, all suggestions and recommendations concerning "plans for the improvement of the system," as the Legislature will not be in session to act upon them. It is in itself sufficiently awkward and embarrassing to be compelled to address a body that does not exist as such, and cannot possibly take note of what you have to say.

The usual reports of the county, city, and borough superintendents are omitted, for the reason that all of them were authorized to be published in the counties, cities, or boroughs where written, and many of them were so published.

The reports of the principals of the several State normal schools are likewise omitted because they were written rather for the Legislature and the Department than for the general public.

The tables of statistics presented exhibit in figures a full account of the condition and working of the system during the past year. The county tabular statements are as complete as they can well be made, and the summary that follows them will enable comparisons to be readily instituted between counties. Those who desire to acquaint themselves with the wonderful growth of our school system since the passage of the law of 1854, will find what they seek by examining the valuable table at the end of the volume.

Statement (M) showing the condition and working of the system as exhibited by the reports of the county and city superintendents, tells its interesting story in a few pages of figures better than it could be told by hundreds of pages of description. Its compilation cost a vast amount of labor, and it is believed to be reasonably accurate.

Statement (N) will enable instructive comparisons to be made respecting the condition of educational affairs in our principal cities.

The working of our teachers institutes can be seen in statement (O.) No such table could be compiled in any other State in the Union. Our institutes have assumed a size and an interest unequalled elsewhere, and their power as an agency for good, heretofore great, is believed to be yearly growing greater.

Those interested can find in statement (P) a condensed account of what our normal schools have done and what they are doing for the cause of public education. A discerning eye cannot fail to see in it, also, both their strength and their weakness. No efficient system of public instruction is possible without them, and so far as ours are weak they should be made strong.

Throughout the report an effort has been made to show how the money raised for school purposes has been expended. This, indeed, was the main object of publishing a report at this time. Other things can wait; those who handle the people's money should account promptly for the use that

has been made of it. To this part of the report the closest scrutiny is invited. Since the present State Superintendent came into office, more than \$100,000,000 have been raised and expended for the education of youth; it is a proud record for the school men of the State to be able to say that a few thousand dollars would cover all the losses. During the flush times following the war there may have been some extravagance in the building of school-houses, but actual dishonesty among school board officials is almost unknown.

For two years past the State has been unable to pay promptly the appropriation to the schools. The State Treasurer was without the necessary funds available for that purpose. It is believed that this condition of things will not exist, at least to the same extent, in the future, and that the districts may hereafter expect their State money with reasonable promptness.

It will be the duty of the State Superintendent to make a full report to the Legislature at its next session; meantime, the system is commended to the good will and generous support of the people.

J. P. WICKERSHAM,
Superintendent of Public Instruction.
